DETAILED ACTION

1. Applicant's response filed on 08/04/2005 has been fully considered. Claims 12-38 are cancelled, claims 1-11, 39 and 40 are pending.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 2 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Yamauchi et al. (US 5,387,013).

Yamauchi discloses a transfer media comprising a substrate, a design layer and an adhesive layer, wherein the design layer comprises carbon black (Fig. 5, col. 4, line 50 and col. 31, line 17). The design layer is equivalent to the claimed ink film, the adhesive layer is equivalent to the claimed tacky resin, and the carbon black is equivalent to the claimed pigment.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Yamauchi et al. (US 5,387,013), as applied to claims 1, 2 and 9, above.

Yamauchi does not disclose the use of a release liner over the adhesive layer. However, at the time of the invention, it would have been obvious to a person of ordinary skill in the art to cover the adhesive layer of Yamauchi with a release liner so as to keep the adhesive layer from damaging while handling and/or storing. Protecting an adhesive layer with a release liner is well known in the transfer medium art.

Allowable Subject Matter

6. Claims 3, 4, 6-8, 10, 11, 39 and 40 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

7. Applicant's arguments with respect to claims 1-6, 8-11, 39 and 40 have been considered but are moot in view of the new ground(s) of rejection.
